

Support / Resources for:  
Children with Autism  
Children who may have emotional, communication, learning needs

## Social stories

Social stories were initially developed for children with Autism Spectrum Disorder, but they have also proved beneficial to children with additional learning, emotional, cognitive and communication needs. Social Stories should be composed about a situation that the child finds difficult. They are adaptable and easily tailored to meet a multiplicity of needs.

Some free printable social stories can be accessed online, including on the twinkil.com site which has a dedicated Corona virus home support page:
