

SPHE: Myself & the wider world- Environmental care

Now the Spring has finally sprung we will all be outside more enjoying the sunshine. In school we learn lots about caring for ourselves and our environment. Lets look at some fun ways we can do this while school is closed.

My favourite part of Spring is our Spring Walk we do at school every year. We

walk to the park and spot the signs of growth like the buds on the trees , the Daffodils popping up their heads and the birds singing and building their

 nests. Go for a nature walk in your local areas and draw a picture or take photos of all the new growth !

Watch this video of Pippin learning about Daffodils

- ✚ On the school website there are some Mindfulness from www.Twinkl.ie . Print them and colour them in or create your own design

This week our school has fun art materials for everybody, why not try create a spring picture like this one using Kandinsky's circles !

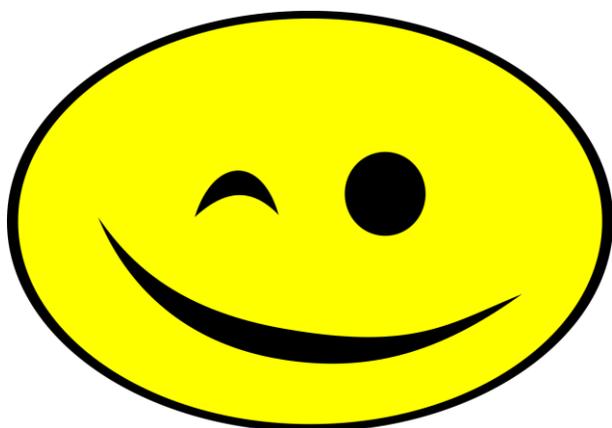

Looking after our environment includes looking after our neighbourhood . Today, why not start in your home, inside or outside. Help Mammy/Daddy or Nanny /Grandad to:

- ✚ Pick up old leaves,
- ✚ Plant new bulbs
- ✚ Recycle cardboard and paper
- ✚ Add bird seed to bird feeder or make one ...
 - You will need: toilet roll, string, peanut butter or frytex, bird seed
 - Spread peanut butter or frytex on the bottom of the toilet roll
 - roll it in bird seed
 - ask an adult to thread String / Pipe cleaners through the top
 - hang it up on a near by tree or fence

it should look like this one ☺

- ✚ Learn your about your area, maybe you could learn your Address !

Have fun and remember
you're a super !
