

Science in Action: Part 2

Dear Parents and Guardians,

As you may be aware, your school has recently been making tremendous efforts to support a project with DCU called 'Science in Action for Infant Learning'. The project aims to develop people's awareness and understanding of Science. A key part of the project involves adults and children using their bodies (embodied cognition) to help them learn scientific concepts and skills. It is all about being an active learner.

As a parent / guardian, you can also become involved! We believe that you too can be 'active' in learning about Science with your child.

Accordingly, Dr John White (DCU) would like to invite you to a second workshop on **Wednesday 22nd June at 12:40 pm (to conclude at 1:30 pm) in St Francis Junior School, Priorswood**. We will explore how to bring Embodied Cognition and a love of science into your home with a few tips and suggestions. In other words how to make science real and fun.

In the meantime, if you wish to explore or find out a little more, please visit our [website](https://www.dcu.ie/sail) (<https://www.dcu.ie/sail>)

We hope to see you on Wednesday 22nd @ 12.40pm

Approximately 15 parents/guardians came to our first session on Thursday 9th and loved it. Please join us for this our second session. Tea/coffee and goodies too.

Best wishes and kind regards,
John White and Cliona Murphy (DCU Team).
